Legge Finishes Portfolio

You never get a second chance
to make a first impression.

Designed and manufactured in
New Zealand, Legge brass pull handles
are the defining finishing touch for
outstanding architectural spaces.

World-class door hardware, designed and made in New Zealand

When you want nothing but the best - with no compromise on design, materials or manufacturing quality – sustainable local craftsmanship beats global anonymity hands down. That's why the Legge brass pull handle range is designed, engineered and finished in New Zealand.

Influenced by New Zealand's most notable contemporary architecture, our creative team conceived and refined their ideas at our office in

Auckland. Their designs were brought to life by local tool-making and metallurgy engineers at our state-of-the-art manufacturing facilities in Auckland.

When you choose Legge Luxe. special finishes, you're endorsing the time-honoured craft of transforming beautiful metals into functional decorative objects that will last forever.

A hand is shown holding a long, polished brass pull handle. The handle is cylindrical and has a smooth, reflective surface. The hand is positioned on the left side of the frame, with the thumb and fingers gripping the handle. The background is plain white, which makes the golden color of the brass stand out. The lighting is soft, highlighting the texture and sheen of the metal.

Why choose a brass pull handle?

When strength and durability is fundamental to your entrance, consider a solid brass pull handle.

As a metal alloy, brass is an exceptionally strong material, even after it's been formed or machined. Pull handles made of solid brass can withstand heavy use without becoming worn or damaged.

Additionally, solid brass is resistant to corrosion, making it an ideal choice for your front entrance where it may be exposed to moisture or coastal conditions. An electroplated solid brass pull handle provides further corrosion resistance.

Brass offers a luxurious touch of elegance. It has a warm, golden appearance that gives it a classic yet sophisticated look. It can be polished to a high shine or allowed to gradually age and acquire a 'living finish'. Electroplating a brass pull handle opens the door to a range of other beautiful finishes to match in with décor and fixtures.

Tuba

ROUND OFFSET PULL HANDLE

Form and function combine to create an elegant offset opening for exterior and interior doors. The asymmetrical aesthetic of this handle works beautifully with adventurous contemporary architecture.

Legge Luxe. finishes and pairings

The finish on door hardware is the final touch that turns a functional piece of hardware into an attractive design element.

Legge pull handles are available in seven finishes. All of these can be matched to other essential door hardware components – mortice lock face plates, cylinders and escutcheons, and levers.

		Common pairings			
		Pull Handles	Legge Levers*	Cylinders and escutcheons	Mortice lock face plates and fixings
	Satin Black Chrome A striking and versatile finish that bridges traditional and modern styles.	■	■	■	■
	Oil Rubbed Bronze Perfect for rustic, down-to-earth living spaces.	■	■	■	■
	Antique Bronze Rich brown hues and golden undertones for a warm, welcoming appearance.	■	■	■	■
	Satin Brass (lacquered) Subtly bold, for the perfect balance of elegance and understated style.	■	■	■	■
	Satin Brass Unlacquered A smooth matt- finish that's subtle yet courageous. Matures over time to gain additional gravitas.	■	■	■	■
	Polished Brass (lacquered) A highly reflective, warm golden sheen that's compatible with a vintage theme.	■	■	■	■
	Polished Brass Unlacquered A classic finish that will age naturally to develop a pleasing and enduring patina.	■	■	■	■

* Legge 6000, 500, 700, 5300, 5400 Series – Refer to our Legge collateral for other finishes available
