

EW3000

Electromagnetic cabinet lock

The FEW3000 early warning alarm lock is purposely designed to provide security to all types of drug cabinets, refrigerators, lockers, show cases, containers and the like where not only locking but also monitoring of both the locking device (LSS) power on / power off, and door position (DSS), door opened or closed, is of concern.

The FEW3000 is also provided with the unique feature of "Early Warning", in the event that unauthorised attempts are made to open the door the locking device triggers a changeover relay signalling 'unauthorised attempted entry'. The lock has a holding force of up to 40kg and accepts 12VDC with a current of 0.3amps.

Features

- Working temperature -10°C to +50°C
- Full monitoring DSS/LSS
- Early warning
- Low power consumption
- Power off to release door

Warranties	
Mechanical	5 years
